BridgeClimb Sydney (“BridgeClimb”) offers its customers (“Climbers”) guided climbing tours (“Climbs”) on the arches of the Sydney Harbour Bridge (“Bridge”). Climbing the Bridge is an active, outdoor experience and Climbs take place in varying weather conditions. Disclosing a health or safety consideration does not necessarily prevent a person’s participation. In most cases it does not.

**THE NEED FOR MEDICAL CLEARANCE**

Medical clearance is required under certain circumstances prior to a customer being allowed to climb the Bridge.

- Walk approximately 1.75 kilometers including up to 1,439 stairs, ascending to 134 meters above sea level. Depending on the choice of Climb, ladder climbing may also be required.
- Remain standing for the duration of the experience, without access to seating or toilet facilities.
- Maintain moderate exertion which requires reasonable levels of fitness and strength.
- Wear a cover-all climb suit, sometimes over a full layer of clothing.

**OUR CLIMBS**

**BridgeClimb**

- A 3 hour 30 minute walking and climbing experience covering 1.75 kilometers, including 1,439 stairs and eight 5-metre ladder sections.
- The pace of walking is leisurely and includes regular rest stops. It is comparable to an eighteen-hole game of golf whilst carrying clubs, or walking 1 kilometer at moderate pace in approximately ten minutes.
- BridgeClimb is considered our second most strenuous Climb.

**BridgeClimb Express**

- A 2 hour 15 minute walking experience, covering 1.75 kilometers and including 1,090 stairs. No ladder climbing is required.
- The pace of walking is moderately intense with limited rest stops. It is comparable to very slow jogging, light cycling or walking 1 kilometer at a very brisk pace in approximately eight minutes.
- BridgeClimb Express is considered our most active Climb, requiring a greater level of fitness than the other Climbs.

**BridgeClimb Sampler**

- This 1 hour 30 minute walking experience including 556 stairs takes Climbers half-way to the Bridge summit of the inner arch.
- No ladder climbing is required. The pace of walking is moderately intense on a continuous basis, with a rest stop scheduled 25 minutes into the Climb. Climbing suits are always worn over a full layer of clothing when taking part in the BridgeClimb Sampler.
- BridgeClimb Sampler is considered the least strenuous Climb due to its shorter duration and distance, not its walking pace.

**ENVIRONMENTAL CONSIDERATIONS**

- Climbing Gear: Climbers wear a full safety harness with a belt worn at the waist weighing a total of 2.2kg. If a pregnant Climber slipped, tripped or fell along the Climb route, the expectant mother may experience a jerk delivered through the belt, which may result in maternal or foetal injury.

**HEALTH AND SAFETY: ESSENTIAL DISCLOSURES**

BridgeClimb asks customers to carefully consider their own health and fitness levels, and not to climb if their participation poses any risk to their health and safety, that of other Climbers, or any other users of the Sydney Harbour Bridge.

The following conditions may impact a customer’s ability to take part in a Climb and therefore require consideration and disclosure:

- Pregnancy
- 75 years of age or older
- Heart conditions (including high or low blood pressure)
- All respiratory conditions
- Injuries or conditions impacting stair or ladder climbing ability
- Chronic illness
- Limb absence or limb difference
- Diabetes
- Vertigo, dizziness or loss of balance
- Surgery, from which you’re still recovering
- Epilepsy

**HEALTH AND SAFETY EXCEPTIONS**

Certain conditions or circumstances will prevent a person from participating in a climb, including:

- Being more than 24 weeks pregnant
- A fit or seizure in the last six months
- Broken bones
- Under 8 years of age
- Under 1.2 metres tall
- Being deemed unfit for climbing by a doctor
INFORMATION FOR CLIMBERS AND DOCTORS

All pregnant Climbers and Climbers 75 years of age and over must ensure this form is completed prior to their arrival at BridgeClimb and present it to our team on the day of the Climb. Other Climbers may be asked to consult a Doctor to complete this form if deemed necessary by BridgeClimb.

Doctors and Climbers must read the front page of this form thoroughly and carefully consider all information therein when discussing participation in a Climb. Doctors must tick any and all appropriate boxes when making a final recommendation.

If you require further information about our Climbs or safe working practices before making your recommendation, please visit our website to view our products or contact our Safety Team: Tel: +61 02 9240 1152  I email: cservice@bridgeclimb.com

PREGNANCY (Please complete this panel after discussing pregnancy specifically)

Climbs are available to expectant mothers who are experiencing normal pregnancies, up to the end of the twenty fourth week. BridgeClimb does not offer Climbs to expectant mothers with medical complications that could affect their ability to complete the experience safely and comfortably. Medical complications may include but are not limited to severe morning sickness, high or low blood pressure, abnormal bleeding, and significant medical conditions such as diabetes, epilepsy and previous back injuries.

Patient’s Name

End date for patient’s 24th week of Pregnancy

Date of proposed Climb

From the information provided by the patient and BridgeClimb, I confirm the patient is:

☐ Not more than 24 weeks pregnant and is experiencing a normal pregnancy
☐ Fit to participate in a Climb (type of Climb experience must be specified in the final panel)
☐ Not fit to participate in any Climb

GENERAL OR SPECIFIC HEALTH CONCERNS (Completed at BridgeClimb’s direction, or Climber discretion)

Patient’s Name

Health considerations discussed during consultation:

☐ 75 years of age or older
☐ Recent surgery, recovery ongoing
☐ Limb, joint or back injury (specified in the final panel)
☐ Heart condition, including high or low blood pressure
☐ Epilepsy (without seizures for the last 6 months)
☐ Diabetes
☐ A respiratory condition
☐ Medically diagnosed vertigo
☐ Limb absence or limb difference
☐ Medication needed during the Climb experience
☐ Another relevant health concern
☐ None of the above

Comment, if appropriate

DOCTORS RECOMMENDATION

From the information provided by the patient and BridgeClimb, I confirm the patient is:

☐ Fit to complete BridgeClimb Express (limited rest stops, moderately intense continuous pace, no ladders)
☐ Fit to complete BridgeClimb (ladder climbing required, frequent rest stops, leisurely pace)
☐ Fit to complete BridgeClimb Sampler (no ladders, limited rest stops, and a moderately intense, continuous pace)
☐ Not fit for any Climb
